

Winter Cat House Project

Davinci's Dream Animal rescue 2025

Hello, We are Davinci's Dream!

The Igloo Winter Cat House Project by Da Vinci's Dream Animal Rescue is a community-driven effort to help outdoor and feral cats stay safe, warm, and dry during the winter months. Using affordable, Igloo coolers, volunteers transform them into insulated shelters that protect cats from freezing temperatures, wind, and moisture.

DA VINCI'S
DREAM

Step 1: Cut a 6 Inch Hole.

It's doorway time! Grab your 6-inch hole saw and make a round entrance near the front corner of the cooler. This little opening will be your kitty's front door — just the right size to slip in, curl up, and stay toasty all winter long.

Step 2: Add the Cozy Trim!

Cut an 18-inch piece of 1-inch pipe insulation and pop it around the edge of the hole. It's like adding a soft bumper — keeps the entrance smooth and helps hold in warmth. Fancy and functional!

Step 3: Drill 4 Small Drain Holes

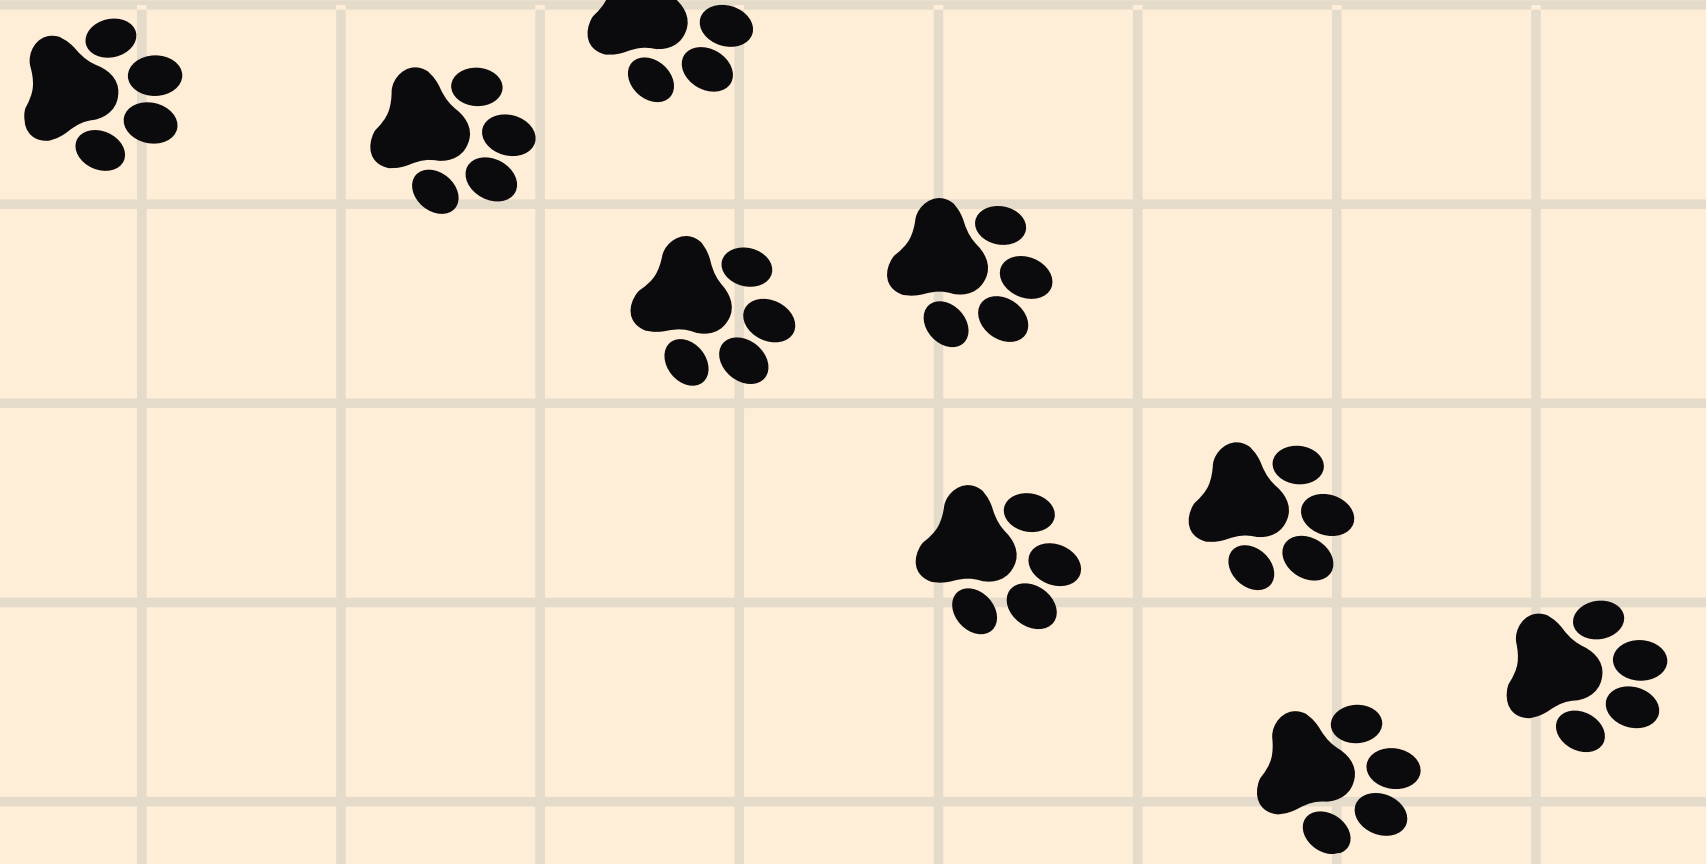

Drill or four small holes in the bottom of the cooler for drainage. That way, if any moisture sneaks in, it can escape — no soggy paws allowed!

Step 4: Add the Straw!

Time to fluff it up! Add a generous layer of straw inside. Straw stays dry and cozy, creating the perfect nest for chilly kitties to curl into. Think of it as their golden blanket.

Step 5: Seal It Up!

Close up the back of the cooler and tape it tightly. This locks in warmth and keeps out drafts. Your cat house is ready — a snug, safe hideaway for your outdoor friends!

Share Your Build!

We'd love to see the cozy homes you create for your community cats!
Each Igloo Winter Cat House built spreads warmth, kindness, and inspiration.

 Snap a photo of your finished cat house (bonus points if you catch a curious cat checking it out!).

 Share your story — what inspired you to build it, and who you built it for.
